

NEW PARTNERSHIP

GES Biotek + JBI Water & Wastewater

Stronger local access to advanced biological odor-control solutions across the West

GES Biotek, LLC has appointed **JBI Water & Wastewater** as its independent manufacturer's representative across the western United States, sharpening regional sales coverage and giving municipalities, industrial facilities, engineering consultants, contractors, and OEMs a direct line to GES's biological odor-control solutions and application support.

Why This Partnership Matters

JBI will identify new odor-control projects, support replacement-media and biofilter-rehabilitation opportunities, and connect customers and engineers with GES early in project development.

GES Biotek will back JBI and its customers with media-selection assistance, airflow and empty-bed residence time review, specification support, technical presentations, and installation, startup, and testing assistance where included in project scope.

“

*This partnership will help us **respond earlier** to project needs, **support engineers** and owners more effectively, and **expand access** to our sustainable biological odor-control media throughout the West.*

STEVE McCANCE | VP OF OPERATIONS, GES BIOTEK

“

*GES Biotek's product range and technical approach are **a strong fit for the odor-control needs** we see across our territories.*

JIM ZAISER | OWNER, JBI WATER & WASTEWATER

GES Biotek

Engineered biological filtration media and related components and services for municipal and industrial odor control. 25+ years in market. 3M+ cubic feet of bio-oxidation media supplied. U.S.-manufactured. GESBiotek.com

JBI Water & Wastewater

Manufacturer's representative serving municipal and industrial water/wastewater markets across the western U.S. Connecting owners, engineers, contractors, and equipment makers to practical solutions for 45+ years.
